DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to network managing/monitoring status, classified in class 715, subclass 736.
 - II. Claims 23-27, drawn to electronic controlling/storing operation data of a respiration device, classified in class 128, subclass 204.18 or 204.21.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as managing/monitoring an interface for status of a device that permits the user to conduct administrative operations or perform observations of the current state of the components; and invention II has separate utility such as controlling/storing operation data of a respiration device.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2179

4. Because these inventions are distinct for the reasons given above and the search required for each Group is different, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Attorney Jack Schwartz on November 24, 2004 to request an oral election to the above restriction requirement; for further discussion with the Clients, the Attorney has required the Office to send out the Election/Restrictions.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
